DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on March 26, 2004 has been considered by the Examiner and made of record in the application file.

Allowable Subject Matter

2. **Claims 1-8** are allowed.

3. The following is an examiner's statement of reasons for allowance:

Consider **claim 1**, the best prior art found during the examination of the present application, **Bender et al. (U.S. Pub # 2002/0052204 A1)**, fails to specifically show, disclose, or suggest that the mobile station is in a "power-off" state while the traffic channel assignment process is executed. Also, it does not suggest that a handshaking protocol is used to execute the rapid assignment of traffic channels.

Bender et al. clearly show and disclose base station initiated traffic channel assignment for a mobile station that is in an "idle" state, which includes sending "page" messages on a forward link control channel, and the mobile station monitoring and responding to pages sent on the control channel. However, Bender et al. lacks the claimed step of the mobile station measuring RSSI levels for received paging request messages, and offers no suggestion or motivation as to using RSSI measurements in

traffic channel assignment, therefore, this limitation with other limitations recited in claim 1, is novel and unobvious in view of Bender et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
